Subject: Fairfield University - Hackathon Event

Good afternoon,

My name is Jessica Teri. I am the Assistant Dean of Undergraduate Studies for the School of Engineering at Fairfield University.

We are excited to share an upcoming event that may interest your STEM-interested seniors. We will be hosting two Hackathon events with **scholarships** prizes to our School of Engineering.

- Saturday, October 23rd – In person
- Sunday, October 24th – Virtual

Hackathons are educational competitions in which students engage in collaborative problem solving scenarios. This event would be a phenomenal learning experience for high school students interested in a STEM discipline. If your students are interested, they should form a team of 3-5 participants. We would accept one team per school for each event.

I have attached a flyer, you can always provide them with the link below.

<https://www.fairfield.edu/staghack/>

If you have any questions please feel free to reach out to me directly.

Sincerely,
Jessica Teri, MS
